

# MIHAD KHADEM

## FULL STACK SOFTWARE ENGINEER

**Address:** Badda, Dhaka  
**Phone:** +880 1639286145  
**Email:** mihadkhadem@gmail.com  
**Github:** [mihad-khadem](#)  
**Linkedin:** [Mihad Khadem](#)  
**Portfolio:** [mihadkhadem](#)

### PROFESSIONAL SUMMARY

---

Full-stack engineer with a backend-first mindset, skilled in ExpressJS, NestJS, the MERN stack, TypeScript, and PostgreSQL. Crafting scalable, secure, and high-performance systems for real-world applications. Rapid self-learner with strong problem-solving ability, consistently mastering new technologies and delivering end-to-end solutions with precision and ownership.

### SKILLS

---

**Languages :** Typescript, Javascript, Python (intermediate) PHP (beginner), Golang (beginner).

**Front-End:** React.js, Redux, React Query, Next.js, HTML5, CSS3, Bootstrap, Tailwind CSS

**Back-End:** Node.js, Express.js, Nest.js, RestApi, Fiber, FastAPI, MongoDB, Mongoose, PostgreSQL, Prisma, Gorm, JWT/OAuth, Authentication, MVC, layered architecture, microservices basics

**Tools & Platforms:** Git, Bash, VS Code, Postman, Stripe, Firebase, Vercel, Notion.

**Other Skills:** Fast Typing, Microsoft 360, Google Workspace, Customer Communication, Technical Documentation

**IT Support & Systems :** Windows/Linux administration, network issue resolution, system setup, basic networking, software installation, hardware diagnostics, printer/router/switch configuration

### EDUCATION

---

**Diploma in Computer Engineering**

Sep 2021 - Jun 2024

Habiganj Polytechnic Institute. Gopaya, Habiganj.

**Grade:** 3.43 (out of 4)

### WORK EXPERIENCE

---

#### Software Engineer

Bulipe Tech Ltd, Mohakhali, Dhaka.

June 2025 – Nov 2025

- Built and maintained responsive, high-performance web applications using React.js, Next.js, Tailwind CSS, and Redux, ensuring seamless user experiences.
- Collaborated on backend development with Node.js, Express.js, and NestJS, integrating APIs to deliver end-to-end full-stack solutions.
- Optimized system architecture and implemented reusable components, improving scalability, maintainability, and overall project efficiency.

#### Customer Service Officer

Genex Infosys Ltd, Chattogram

Jan 2025 – May 2025

- Resolved customer inquiries and complaints across multiple channels, achieving a 95% satisfaction rating while maintaining high call quality standards.
- Trained and mentored new representatives, reducing onboarding time by 25% and improving overall customer service efficiency.

#### MERN Stack Developer Intern

Dizit Ltd, Dhaka

Jul 2024 – Dec 2024

- Developed and optimized responsive MERN applications, improving load times by 25%, boosting user engagement by 15%, and enhancing API efficiency by 20%.

- Debugged and maintained full-stack features, reducing bug resolution time by 30% and ensuring stable, high-performing product releases.

## PROJECTS

---

### POS Inventory Management App

(Ongoing)

**Tech Stack:** React.js, Node.js, MongoDB, Stripe, Tailwind CSS

- Designing and developing a POS and inventory dashboard with real-time analytics and interactive visualisations to enable faster, data-driven decisions.
- Optimising performance and UX by focusing on efficient data retrieval and smooth monitoring across key business metrics.
- Integrating secure payment processing and streamlined inventory tracking to support scalable retail operations.
- Parallel Practice: Enhancing skills by practising raw JavaScript implementations alongside the project to strengthen core problem-solving and logic-building ability.

### Credentials Manager – Secure Secrets Storage (Go)

(Ongoing)

**Tech Stack:** Go (Fiber), PostgreSQL, React, Tailwind, Docker, AES-GCM, PBKDF2, JWT.

- Building a self-hosted credentials manager that encrypts all secrets before database storage, ensuring zero plaintext exposure and user-level isolation with a responsive React dashboard for managing.
- Implementing AES-GCM encryption, PBKDF2 key derivation, and JWT authentication to deliver a zero-trust, secure backend API with fine-grained control.
- Containerizing the full stack with Docker and structuring the backend using Go's Fiber framework to improve performance, maintainability, and scalability.
- Strengthening backend fundamentals by exploring low-level crypto flows, secure API design, and clean architecture patterns in Go.

### Task Management App

(Backend)

**Tech Stack:** TypeScript, NestJS, Prisma ORM, PostgreSQL, Docker

- Built a modular & scalable task management backend capable of handling Users, Projects, Tasks, Comments with CRUD operations.
- Implemented soft deletes, enums for task status & priority, archiving support, and validation via DTOs + class-validator to ensure clean API interactions. [GitHub](#)
- Dockerized the whole setup (NestJS + Postgres) with Docker Compose for easier environment setup & deployment.
- Planned features include role-based access control (User/Admin), dashboards (user/admin), analytics, notifications, and Kanban/timeline UI.

### University Management System

(Backend)

**Tech Stack:** TypeScript, Express.js, MongoDB, Mongoose, Node.js

- Built a full-stack university management system with robust validation and error handling to manage faculty, courses, and student records.
- Implemented faculty-course assignments, prerequisite tracking, and session-based transactions to ensure data accuracy and consistency.
- Designed a modular, service-based architecture, improving scalability, maintainability, and overall system efficiency.
